

Adult Day Care Food Allergy Fact Sheet

Managing Food Allergies: Adult Day Care Directors

1. Participate in a food allergy management team.

- Include people on the food allergy management team such as nurses, foodservice director, registered dietitian, activity director, administrator, and Section 504 Coordinator (if site has more than 15 employees).
- Create and implement food allergy procedures as required by State and licensing requirements. Offer to help write a food allergy plan if the center does not currently have one, or write the foodservice portion of the site's allergy policy.
- Incorporate food allergy management procedures into your Standard Operating Procedures (SOPs) or food safety plan. For example, write procedures for activities such as cleaning and sanitizing, preparing allergen-free foods, and serving participants with food allergies.

2. Participate in team meetings for individual participants with food allergies.

- Meet with the food allergy management team to discuss a participant's food allergies.
- Work with team members, in particular the nurse, adult participant, family, caregiver, or guardian, to obtain a medical statement. A medical statement is required when the modification cannot be provided within the Child and Adult Care Food Program (CACFP) meal pattern. The team will create a food allergy action plan/emergency care plan for the participant with food allergies.

3. Implement, monitor, and update food allergy prevention procedures for adult day care.

- Follow your State and Federal disability laws and USDA regulations regarding participants with food allergies.
- Monitor, review, and update SOPs for food allergy compliance.
- Provide training on how to implement food allergy prevention procedures for all staff who interact with participants with food allergies.
- Include the following in food allergy prevention procedures:
 - Allergy information
 - ♦ Identify participants with food allergies while keeping their medical information confidential.
 - ♦ Provide allergy information for menus and food prepared for field trips to participating adults, family, caregivers, or guardians.
 - ♦ Maintain contact information for vendors to obtain food ingredient information.
 - ♦ Contact food manufacturers about possible allergens in a food product or look for vendors that offer allergen-free options.
 - ♦ Sign up for food recall alerts on the Federal government's food safety website (www.recalls.gov).

Managing Food Allergies: Adult Day Care Directors

- Food storage and preparation
 - ♦ Prevent cross-contact with cleaning and sanitizing procedures.
 - ♦ Store, prepare, and serve allergen-free food to prevent cross-contact.
 - ♦ Read ingredient lists for food allergens.
 - ♦ Keep food labels for the recommended 24 hours after the food is served in case of an allergic reaction.
- Food Service
 - ♦ Serve participant(s) with food allergies first if doing family style dining. Ensure that they do not take a food item to which they are allergic.
 - ♦ Create an environment that is as safe as possible from exposure to food allergens.
 - ♦ Discourage participants from sharing or trading food, drinks, straws, or utensils.
 - ♦ Provide appropriate supervision during mealtime.
 - ♦ Encourage handwashing before and after eating.
 - ♦ Respond to a food allergy emergency.
