

Safety of Participants

- Does the SA (or does the SA require sponsors to) assess the site itself, as well as the general area around the site, to ensure there are no physical safety hazards for participants?
 - If the SA is conducting monitoring and assesses that the site is unsafe, what are the SA's procedures?
- How do you ensure that the children are safe as they eat their meals, whether they are inside or outside?
- In your SA experience, do you know of any sites promote an environment of mutual respect between the participants?
- Discuss, if any, state developed guidance or direction given to SFSP sponsors on issues where children at the site are being bullies to other children.
- Discuss requirements, if any, that your state has for SFSP sites to connect with local law enforcement.
- Does your SA encourage sites to have a person trained in anything (such as CPR, bully prevention strategies, de-escalation techniques, Heimlich maneuver). Other?
